

JON ONEILL

PRODUCT LEADER | P&L OWNER

Phoenix, AZ | 928.499.8446 | jon.oneill.m@gmail.com | linkedin.com/in/jon-oneill-020196 | jononeill.dev

SUMMARY

Product leader and P&L owner returning to product after building and turning around a service business with software. Seven years across SaaS launches, pricing and underwriting platforms, analytics, and operational automation, with a track record of turning complex workflows into measurable business results.

CORE SKILLS & TOOLS

Product: Strategy, roadmaps, 0-to-1 SaaS, go-to-market, pricing platforms, executive communication **Data & Build:** SQL, Python, machine learning workflows, Claude Code, Playwright, Cloudflare, Next.js

EXPERIENCE

Zoom Drain Phoenix | Co-Founder & Owner

Sep 2023 - Present

Part-time through Jul 2024; business sale in progress

- Turned around a failing franchise to approximately \$950K in annual revenue and four trucks, with full P&L ownership.
- Cut average booking time by three hours and office labor spend by approximately 30% by automating intake, booking, and customer communications.
- Standardized dispatch and built guided quoting tools that enabled technicians without pricing backgrounds to estimate jobs accurately.
- Scoped, priced, and won commercial sewer and multi-crew renovation projects, negotiating added scope with property and facilities stakeholders.

Livable | Head of Product

Sep 2023 - Jul 2024

- Launched a SaaS offering from concept to public release, acquiring 2,000 units in the first four months.
- Secured an enterprise integration campaign that added thousands of units and created evergreen exposure to an 8M-unit base.
- Improved customer satisfaction by rebuilding the roadmap around direct user feedback; hired and mentored product, design, and analytics talent.

Stoa | Senior Product Manager, SaaS & Data Integrations

May 2022 - Jul 2023

- Compressed underwriting cycle time 85%, supporting more than \$1B in real estate underwritten and \$300M in completed purchases.
- Consolidated 22 data vendors to six, cutting annual spend approximately \$400K while improving data quality.
- Applied machine learning and process automation across underwriting, producing up to \$4M in labor savings.
- Rebuilt end-to-end data integrations, cutting integration time 40% and improving data accuracy 25%.

HomeLight | Product Owner, Acquisitions

Mar 2021 - May 2022

- Designed the underwriting model behind Cash Close, an \$800M annual book, and built a product generating 300 automated offers per month for the company's largest client.

Zillow | Data Analyst

Sep 2019 - Mar 2021

- Valued residential real estate using SQL, Python scripts, and a proprietary underwriting model; partnered with the machine learning team to train and refine pricing models.

SELECTED PRODUCT BUILD

Ecclesio | Church Operations Software

Dec 2025 - Present

- Shipped a multi-tenant SaaS platform from zero to beta in four months, directing contract engineering and later assuming ownership of the full stack.
- Orchestrated an AI-enabled engineering workflow with Claude Code and more than 1,000 automated Playwright and Vitest tests; built on Cloudflare, Next.js, and Python tooling.

TRAINING & CERTIFICATIONS

Tracked Ltd. - Engineering and Product Analytics
